

MARIA SOFIA NOLAZCO

Civil Engineering · Data Analyst

Santiago de Chile | sofinolazco@gmail.com | (56) 9 9225-5129 | [linkedin/maria-sofia-nolazco](https://www.linkedin.com/in/maria-sofia-nolazco) | sofianolazco.github.io

ABOUT ME

Civil Engineering transitioning into **Data Analyst** with a background in **cost control and project management**. Experienced in working with structured data, building reports, tracking KPIs, and supporting decision-making through analysis. Currently completing formal training in data analytics, with hands-on experience using Excel / **Google Sheets**, **Power BI**, **SQL**, and **Python**. Detail-oriented, analytical, and highly organized, with strong communication skills in multidisciplinary environments.

PROFESSIONAL EXPERIENCE

Cost Manager

Gleeds | Sep 2022 - Nov 2025 | Barcelona, SPAIN

- Analyzed cost data across the project lifecycle to support budget control and financial decision-making
- Built cost reports, comparative scenarios, and variance analyses to track project performance
- Monitored budgets and identified deviations, supporting corrective actions
- Collaborated with multidisciplinary teams to improve data traceability and reporting accuracy

Construction Planning Analyst

Victor Contreras S.A. | Jun 2021 - Jun 2022 | Buenos Aires, Argentina

- Tracked project schedules and milestones using structured planning data
- Prepared progress and management reports for internal stakeholders
- Organized and maintained technical documentation and datasets

Technical & Bidding Analyst

Urban Baires S.A. | Feb 2019 - Aug 2019 | Buenos Aires, Argentina

- Processed and analyzed data for bids and cost estimates
- Evaluated proposals and performed preliminary cost calculations
- Managed supplier information and pricing data

EDUCATION

Civil Engineering

Pontificia Universidad Catolica Argentina

2015 - 2021 (Thesis in progress)

Data Analyst Full Program

Unicorn Academy

2025 - 2026

- Data analysis fundamentals, SQL databases, Python for data analysis, and BI dashboards

FEATURED PROJECTS

DATA · BUSINESS INTELLIGENCE

Financial & Operational Dashboard - Clínica Azul

[Google Sheets](#) · [ETL](#) · [Pivot Tables](#) · [KPIs](#) | [View Project](#)

Business intelligence (BI) system for a healthcare clinic: full ETL process, data cleaning, and dashboards with interactive filters. KPIs: revenue by patient type, sessions per professional, and office occupancy. Executive report covering descriptive, diagnostic, and prescriptive analysis.

Operational Analysis of Service Tickets - ServiTech

[Power BI](#) · [DAX](#) · [Dimensional Modeling](#) · [KPIs](#) | [View Project](#)

EDA on 9,000+ technical support records (2020–2023). Interactive 4-page dashboard, DAX measure for year-over-year (YoY%) variation, and identification of operational bottlenecks.

ETL, Modeling & Data Cleaning - Classic Models

[SQL](#) · [MySQL](#) · [Star Schema](#) · [ETL](#) | [View Project](#)

Full ETL pipeline in MySQL with a star schema (5 tables). Data cleaning: ISO date formatting, field splitting, and referential integrity. Database ready for sales, customer, and inventory analysis.

CIVIL ENGINEERING

Shushah Island Project - Saudi Arabia

[Cost Management](#)

Cost management on a project in Saudi Arabia featuring an innovative 3D modular structural system. Technical review across multiple disciplines, international coordination, and cost reporting in English.

5-Star Hotel Costa Ballena - Spain

[Cost Management](#)

Cost control and technical coordination on a large-scale hotel (450 rooms) with a prefabricated structure. Parametric estimation by zones and participation in engineering and design meetings.

Pérgolas Port Fòrum - Spain

[Cost Management](#) · [Project Management](#)

Project Manager on an urban pergola structure renovation, covering design, demolition, and construction. Coordination across multiple disciplines, construction site monitoring, and supervision of surrounding area adaptations (pavements and street furniture).

TECHNICAL SKILLS

Data Analysis & BI: Data cleaning, exploratory data analysis (EDA), KPI definition, dashboard creation, comparative analysis

Data Tools & Technologies: Google Sheets, Excel, Power BI, SQL, Python

Project & Business Analysis: Cost analysis, budget tracking, variance analysis, reporting for decision-making

AI-Assisted Data Analysis: Generative AI tools for SQL query optimization, Python debugging, data exploration support, and workflow automation (ChatGPT, Gemini, Claude)

Other Tools: AutoCAD, Revit

LANGUAGES

Spanish: Native

English: Advanced
